# WE'RE HIRING DEVELOPERS!

Do you have what it takes?
Find out below!

A job at East Solutions means much more than a way to pay the bills at the end of the month. At East Solutions you can change the lives of our customers by making the ideal app/website/IoT solution for them. Is working in an enthusiastic and driven team something for you? Do you think you have sufficient skills to start? Don't hesitate to contact us.

eastsolutions

As a front-end developer at East Solutions you will be dealing with HTML5, CSS3 and JavaScript on a daily basis in the form of React. You will work together with the other developer (both front- and back-end) within your team to achieve a brilliant end result. Feel free to take a look at our website to see what we have created in the past.

We expect our employees to have at least a bachelor's degree in a relevant field of study. Knowledge of HTML5, CSS3 and JavaScript is a must, knowledge of React is a plus, but not required. This course can be taken while working here.

This is a full-time job. You are expected to perform at least 40 hours a week, you can choose when you start and stop working on a daily basis. The lunch break is every day at 12:30, during this break it is customary for everyone to eat together to improve the group feeling. For this work you will be compensated for about 2200 euro net. There is also the possibility to get a company car.

To apply for the job, send your CV and cover letter to our hiring manager S.Wancour: jobs@eastsolutions.com
